Hinged or sliding?

Sliding doors need no swing space, so they suit tight bars where staff pass close to the fridge. Hinged doors open fully for faster restocking.

Black or stainless?

Black stainless suits customer-facing back bars. Brushed stainless steel matches kitchen and cellar equipment.

Will it fit?

Every model is 895mm tall or less, so all fit under a standard 900mm bar counter. Leave a gap at the back and sides for ventilation.

Running costs

At 25p per kWh, each 1 kWh a day costs about £91 a year to run. The 126L models are the cheapest to run.
