Juice Dispenser InstallationInstructions

Important Notes

- When installing the faucet, please ensure that the red sealing ring and silicone flat gasket are not damaged and the direction is correct.
- Please check whether the faucet is installed firmly before each use to prevent liquid leakage.
- The water collection tray should be cleaned regularly to maintain hygiene.
- The ice cylinder is made of stainless steel and can hold ice cubes or pour hot liquid.
- Please use the handles on both sides of the bucket during transportation, and do not only lift the top cover or faucet.

Installation Steps

Step 1: Assemble the Base

1. Install the rubber feet to the four corners of the base
2. Place the water tray into the front slot of the base and cover it with the water tray cover
3. Install the large support in the middle position above the base, ensuring it is securely fastened

Step 2: Install the Faucet

1. Insert the locking nut from the inside of the barrel into the faucet installation hole
2. Place the silicone flat pad around the locking nut and tightly adhere to the inner wall of the barrel.
3. Place the red sealing ring at the root of the faucet thread.
4. Insert the faucet into the installation hole from the outside of the barrel and tighten it with the internal locking nut until both sealing rings are tightly pressed and there is no shaking.

Attention:

- The red sealing ring is located between the outer wall of the barrel and the faucet.
- The silicone flat washer is located between the inner wall of the barrel and the locking nut.
- Both gaskets are indispensable, otherwise it may cause water leakage.

Step 3: Install the Container and Base Seat

1. Fix the large barrel base on the upper end of the large support
2. Place the small bucket with the installed faucet into the large bucket seat, ensuring that the bottom is stable and the faucet is facing forward
3. The handles on both sides of the barrel can be directly used for handling without the need for additional installation

Step 4: Install the Ice Tube and Liner

1. Place the inner lining inside the ice bucket
2. Place the assembled ice bucket in the center of the bucket, ensuring that the bottom fits snugly against the bucket

Step 5: Install the Lid

1. Cover the top of the bucket with a small cap
2. Insert the little Getty into the central slot of the top cover for opening and closing
